Document prepared by Pierre Dieumegard for [Europe-Democracy-Esperanto](#)

The purpose of this "provisional" document is to enable more people in the European Union to become aware of documents produced by the European Union (and financed by their taxes). **Without translations, citizens are excluded from the debate.**

This document "Eurobarometer" [only existed in French, German and English](#), in a pdf-file . From the initial file, we created an odt-file, prepared by Libre Office software, for machine translation to other languages. The results are now [available in all official languages](#).

It is desirable that the EU administration takes over the translation of important documents. "Important documents" are not only laws and regulations, but also the important information needed to make informed decisions together.

In order to discuss our common future together, and to enable reliable translations, the international language Esperanto would be very useful because of its simplicity, regularity and accuracy.

Standard Eurobarometer 100
Autumn 2023

Introduction

Standard Eurobarometer 100

Autumn 2023

This First Results Report details the first results of the Standard Eurobarometer survey of Autumn 2023 (EB100) in the 27 EU Member States¹. It is published with the results of the Standard Eurobarometer questions, which are detailed in an annex. The survey was carried out between 23 October and 14 November 2023.

War in Ukraine

Russia's war of aggression in Ukraine is ongoing, more than 18 months after it invaded the country on 24 February 2022. The protracted war continues to have an impact on both Europe and the rest of the world in a wide range of areas including energy security, global food security and geopolitical alliances. Since the start of the war the EU and its Member States have provided close to €85 billion in economic, humanitarian, and military support to Ukraine.² In the period since the Standard Eurobarometer of Spring 2023 (May-June 2023) and the current survey, EU actions relating to the war have included:

- On 28 September, on a proposal by the Commission, the Council extended the system of temporary protection for Ukrainian refugees until 4 March 2025.
- On 27 October EU leaders reiterated their condemnation of Russia's war of aggression in Ukraine and their commitment to the recovery and future reconstruction of Ukraine.
- In November 2023 the European Commission allocated additional €110 million in humanitarian aid, bringing the total humanitarian aid provided by the EU since the start of the war to €843 million.³
- On 4 November 2023 President von der Leyen made her sixth visit to Kyiv since the Russian full-scale invasion.
- On 8 November 2023 the European Commission recommended the European Council open EU access negotiations with Ukraine as part of the 2023 Enlargement Package.⁴
- On 15 November 2023 the Commission and the High Representative submitted proposals for 12th package of sanctions against Russia⁵.

1 Some questions were asked also in 12 other countries or territories between 18 October and 17 November 2023: Albania, Bosnia and Herzegovina, the Turkish Cypriot Community in the part of the country that is not controlled by the government of the Republic of Cyprus, Moldova, Kosovo (this designation is without prejudice to positions on status, and is in line with UNSCR 1244/99 and the ICJ Opinion on the Kosovo declaration of independence), Montenegro, North Macedonia, Norway, Serbia, Switzerland, Turkey and the United Kingdom. Fieldwork started earlier in Montenegro because of national census between 1 and 15 November

The Middle East crisis

On 7 October 2023, Hamas launched a terrorist attack on Israel with reports of approximately 1,200 killed and around 240 people taken hostage⁶. On 8 October Israeli Prime Minister Netanyahu formally declared war on Hamas in response. According to Gaza's Ministry of Health retaliatory airstrikes have killed more than 15,000 (figures deemed reliable by the United Nations)⁷ The conflict is ongoing with Israeli armed forces now operating in Gaza, which faces a growing humanitarian crisis.

The Hamas attack has been condemned in the strongest possible terms by the European Council, which also affirmed Israel's right to defend itself in line with international law and international humanitarian law and called for the immediate release of all hostages⁸. It also expressed its gravest concern for the deteriorating humanitarian situation in Gaza and called for continued, rapid, safe and unhindered humanitarian access and aid to reach those in need. The European Commission has quadrupled its humanitarian assistance to Gaza in 2023.

The EU is committed to a sustainable peace based on a two-state solution. On 13 October 2023 President of European the Commission von der Leyen and President of the EU Parliament Metsola visited Israel.

Energy security

As a result of the energy crisis triggered by Russia's invasion of Ukraine and weaponisation of energy supplies, the EU has taken a wide range of measures to improve energy security. The success of the gas demand reduction regulation of August 2022 in reducing consumption has led to its extension for a further year. The impact of these measures is further highlighted by the announcement on 18 August 2023 that the target of filling gas storage facilities to 90% of capacity had been reached more than two months earlier⁹.

The economy

The latest economic outlook shows economic growth has lost momentum in the first half of 2023, although inflation is expected to continue to decline, and the labour market remains strong.

The Autumn 2023 Economic Forecast¹⁰, published in November 2023, predicts GDP growth in the EU to be 0.6% in both the EU and the euro area in 2023. GDP growth predictions for 2024 are now 1.3% for the EU and 1.2% for the euro area.

Standard Eurobarometer 100

Autumn 2023

Inflation is projected to decrease, both in the EU (9.2% in 2022, 6.5% in 2023 and 3.5% in 2024) and in the euro area (8.4%, 5.6% and 3.2% respectively).

Following a string of interest rate rises in 2022, the European Central Bank adopted further interest rate increases in February, March, May, June, August, and September of 2023¹¹.

The labour market continues to perform strongly, with unemployment remaining at a record low. The unemployment rate in the EU is projected to stabilise at 6.0% in 2023 and 2024, slightly down from 6.2% in 2022. In the euro area, unemployment is expected to remain at 6.6% in 2023 and 2024, down from 6.8% in 2022.

EU-related events since the Standard Eurobarometer Spring 2023 survey:

- On 13 September 2023 President von der Leyen delivered her last State of the Union address before European elections in June 2024.
- Summer of 2023 was the hottest on record, with turbulent weather conditions felt right across Europe. Devastating wildfires in Greece and Spain in July were followed by devastating floods only a few weeks later. There were large floods in June in Romania and Serbia, in August in Slovenia, and in Nonivay and Sweden, which were affected by Storm Hans.¹² In October a number of European countries including Denmark, Germany and Portugal were impacted by Storm Babet. In late October and early November storm Ciaran brought strong winds and torrential rain to large parts of western Europe.
- After 18 months in power, the Dutch four-party coalition government collapsed on 8 July 2023 as a result of disputes over migration policy. Prime Minister Mark Rutte led a caretaker government until new elections could be held on 22 November 2023, and announced that he would quit politics at that election.

Elections in the EU since the Spring 2023 survey:¹³

- On 23 July 2023 Spain held parliamentary elections with the People's Party achieving the largest share of the vote (33.1%), followed by the Socialist Workers' Party (31.7%) and Vox (12.4%) and Sumar (12.3%). Sanchez was appointed President of the Government on 29 November 2023, in a coalition government with Sumar.
- On 30 September 2023 Slovakia held general elections. Direction-Social Democracy (SMER—SD), led by former prime minister Robert Fico, came out ahead in with 22.9% of the vote with Progressive Slovakia

(PS), led by Michal Simecka, coming second with 18.0% of the vote. Robert Fico was appointed Prime Minister for the fourth time.

- Luxembourg held general elections on 8 October 2023. Christian Social Party (PCS/CSV), led by Luc Frieden, won 29.2% of the vote followed by the Socialist Workers' Party (POSL/LSAP) led by Deputy Prime Minister Paulette Lenert (18.9%) and outgoing Prime Minister Xavier Bettel's Democratic Party (PD/DP, 18.7%). Luc Frieden was appointed Prime Minister on 17 November in a coalition government between the Christian Social Party and the Democratic Party.
- On 15 October 2023 parliamentary elections were held in Poland with the three opposition party coalitions — Donald Tusk's Citizens' Coalition (KO), Third Way (Trzecia Droga) and the New Left — securing the largest share of the vote (53.7% combined). Voter turnout was at its highest (74.4%) since the return of democracy to the country 34 years ago, and up 12.6 points compared with the previous parliamentary elections in October 2019. Other noteworthy events since the Spring 2023 survey:
- On 26 July 2023 Niger President Mohamed Bazoum was removed from office by a military coup.
- Between 19 and 20 September 2023 Azerbaijan conducted a lightning offensive and occupation of Nagorno—Karabakh, resulting in its surrender. Tens of thousands of ethnic Armenians have fled the region since the surrender. On 17 September judges at the International Court of Justice ordered Azerbaijan to allow ethnic Armenians to return to Nagorno—Karabakh and to keep them safe.¹⁴
- On 24 September 2023 French President Emmanuel Macron announced France would withdraw its ambassador and 1,500 troops from Niger following the coup in the country.

Autumn 2023

Methodology

area

The methodology used is that of the Standard Eurobarometer surveys carried out by the Directorate-General for Communication (“Media monitoring and Eurobarometer” Unit)¹⁵. A technical note concerning the interviews conducted by the member institutes of the Kantar network is annexed to this report. It also specifies the confidence intervals.

Following the EU General Data Protection Regulation¹⁷ (GDPR), respondents were asked whether or not they would agree to be asked questions on issues that could be considered “sensitive”.

Note: In this report, EU countries are referred to by their official abbreviation. The abbreviations used in this report correspond to:

Belgium	BE	Lithuania	LT
Bulgaria	BG	Luxembourg	LU
Czechia	CZ	Hungary	HU
Denmark	DK	Malta	MT

16 The results tables are annexed. It should be noted that the total of the percentages indicated in the tables in this report may exceed 100% when the respondent was able to choose several answers to the same question.

17 2016/679

18 This designation is without prejudice to positions on status and is in line with UNSCR 1244/99 and the ICJ Opinion on the Kosovo declaration of independence.

Cyprus as a whole is one of the 27 European Union Member States. However, the ‘acquis communautaire’ has been suspended in the part of the country which is not controlled by the government of the Republic of Cyprus. For practical reasons, only the interviews carried out in the part of the country controlled by the government of the Republic of Cyprus are included in the ‘CY’ category and in the EU27 average.

We wish to thank the people throughout Europe who have given their time to take part in this survey. Without their active participation, this study would not have been possible.

I. Europeans and the European Union

1. Trust in national governments and parliaments and in the European Union

a. Trust in national governments and parliaments and in the European Union: trend

Trust in the European Union remains at 47%. This result has remained stable since the Standard Eurobarometer EB98 of winter 2022-2023. Trust in national governments has increased since spring 2023 (36%, +4 percentage points), as has trust in national parliaments (39%, +6 pp). The gap between trust in the EU and trust in national governments has narrowed to 11 points, the smallest gap since summer 2020 when it was 3 points.

Distrust in the European Union has remained stable since spring 2023 (45%, no change). However, levels of distrust in national governments (60%, -3 pp) and in national parliaments (56%, -6 pp) have declined.

QA6 How much trust do you have in certain institutions? For each of the following institutions, do you tend to trust it or tend not to trust it? (% - EU - TEND TO TRUST)

Trust in national governments, national parliaments, and the European Union

Standard Eurobarometer 100

Autumn 2023

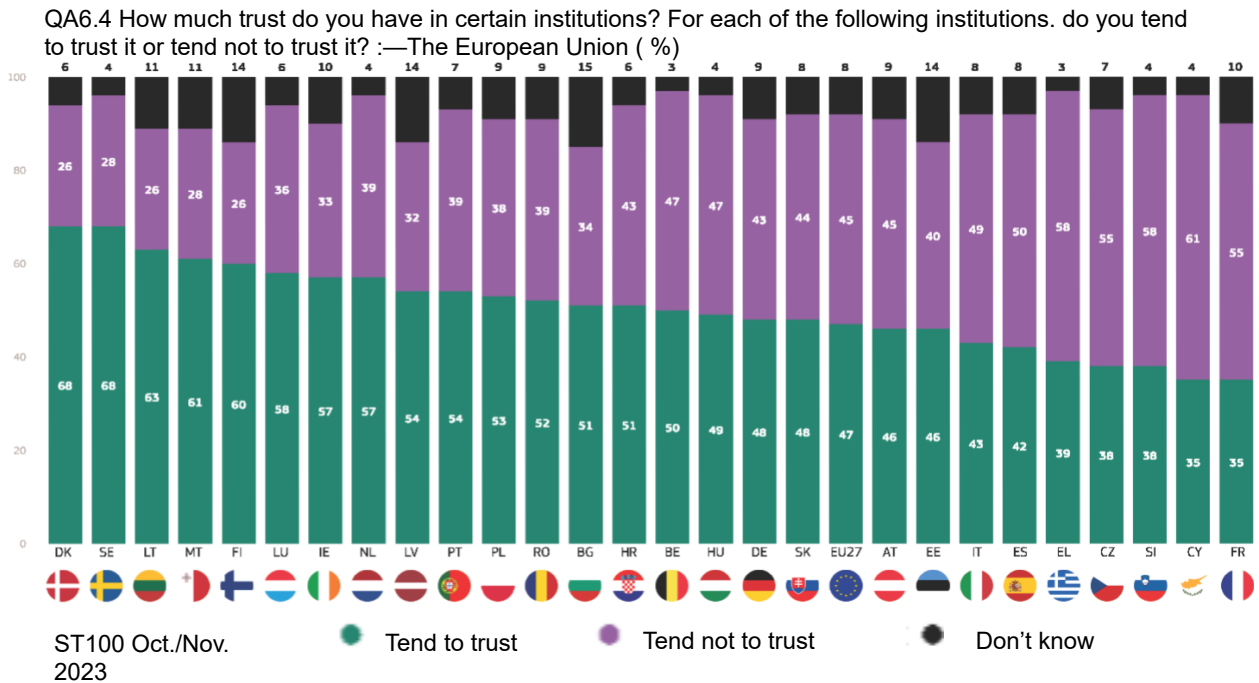

b. Trust in the European Union: national results

In 20 EU Member States (up from 18 in spring 2023), a majority of respondents say they tend to trust the EU, and this is particularly the case in Denmark, Sweden (68% each) and Lithuania (63%). At least six in ten in Malta (61%) and Finland (60%) also trust the EU, as do a relative majority in Austria (46% “tend to trust” vs 45% “tend not to trust”), Estonia (46% vs 40%), Slovakia (48% vs 44%), Germany (48% vs 43%) and Hungary (49% vs 47%).

In the remaining seven countries a majority of respondents tend to distrust the EU: Cyprus (61% “tend not to trust” vs 35% “tend to trust”), Greece (58% vs 39%), Slovenia (58% vs 38%), Czechia (55% vs 38%), France (55% vs 35%), Spain (50% vs 42%) and Italy (49% vs 43%).

Trust in the EU has declined in 15 countries since spring 2023, with the largest drops observed in Portugal (54%, -13 percentage points), Luxembourg (58%, -7 pp) and Ireland (57%, -7 pp). In contrast, trust has increased in ten countries including Germany (48%, +5 pp). There has been no change in Romania (52%) and the Netherlands (57%).

Trust is now the majority opinion in Germany, Austria, and Slovakia, but it has become the minority view in Spain.

Standard Eurobarometer 100

Autumn 2023

c. Trust in the national government: national results

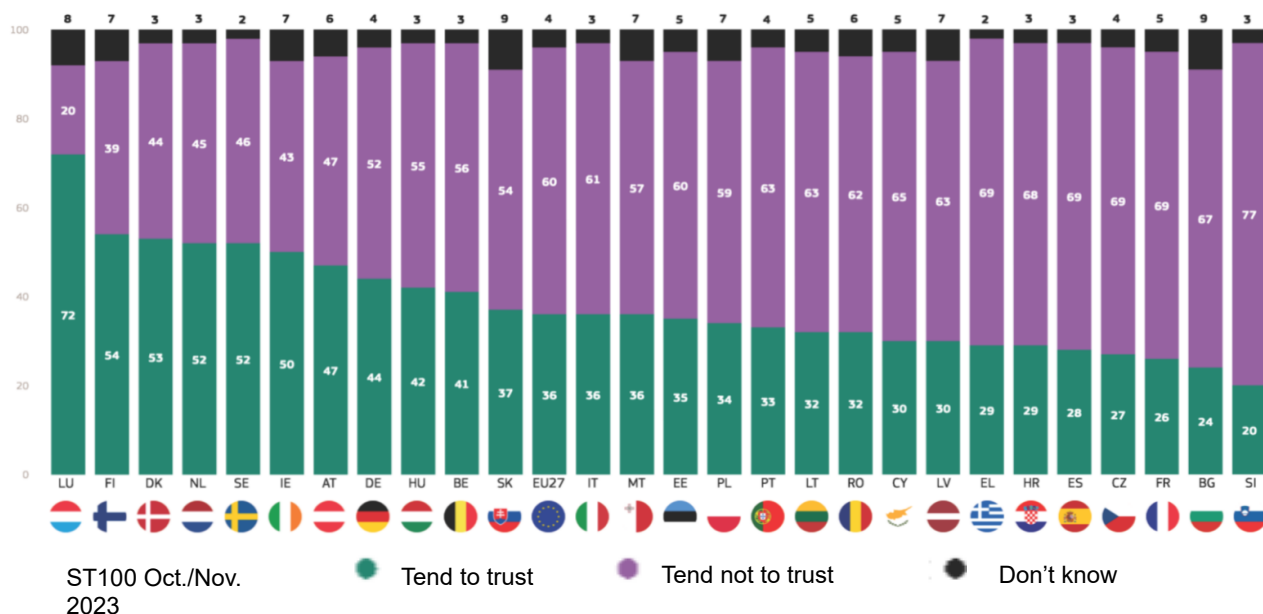

There are six EU Member States (up from four in spring 2023) where at least half of the respondents say they trust their national government: Luxembourg (72%), Finland (54%), Denmark (53%), the Netherlands and Sweden (52% each) and Ireland (50%). In contrast, fewer than one quarter in Slovenia (20%) and Bulgaria (24%) trust their national government.

Opinion is divided in Austria (47% 'trust' vs 47% 'distrust'). In the remaining 20 countries a majority of respondents distrust their national government, with a lack of trust most widespread amongst those in Slovenia (77%) and in Greece, Spain, Czechia, and France (69% each).

Trust in the national government has increased in 14 EU Member States since spring 2023, with the largest increases seen amongst respondents in Slovakia (37%, +18 percentage points), the Netherlands (52%, +16 pp) and Bulgaria (24%, +10 pp). Conversely, trust has declined in nine countries including Portugal (33%, -15 pp), Malta (36%, -7 pp) and Cyprus (30%, -6 pp).

Trust is now the majority opinion in the Netherlands and Sweden.

QA6.2. How much trust do you have in certain institutions? For each of the following institutions, do you tend to trust it or tend not to trust it? :-The (NATIONALITY) Government (%)

2. The image of the European Union

a. The image of the European Union: trend

The positive image of the EU has declined by one percentage point since spring 2023 and stands at 44%.

The neutral image of the EU has increased by one percentage point to 38%, while the negative image has remained stable at 18%.

Image of the European Union

Standard Eurobarometer 100

Autumn 2023

b. The image of the European Union: evolutions and national results

There are 19 EU Member States where a majority of respondents have a positive image of the EU (down from 22 in the Standard Eurobarometer EB99 of spring 2023), with the highest levels seen amongst those in Ireland and Portugal (64% each), Denmark (59%) and Luxembourg (58%).

In seven Member States, the dominant image of the EU is neutral: Spain and Hungary (45% each), Cyprus, Italy and Slovenia (42% each), Greece (37%) and Czechia (36%).

In Austria opinion is split between a positive and a neutral image: 38% positive vs 38% neutral.

Although a negative image is the minority view in all Member States, there are seven countries where at least one in five respondents have a negative image of the EU: Czechia (33%), Greece (27%), France and Cyprus (26% each), Slovakia and Austria (24% each), and Belgium (20%).

Since spring 2023, the positive image of the EU has declined in 18 Member States, and this is particularly the case in Lithuania (51%, -8 percentage points), Ireland (64%, -7 pp) and in Poland (52%, -6 pp), Finland (48%, -6 pp), Latvia (45%, -6 pp), Hungary (37%, -6 pp) and Cyprus (32%, -6 pp). The positive image of the EU has gained ground in seven countries, most notably in Slovakia (41%, +5 pp).

D78. In general, does the EU conjure up for you a very positive, fairly positive, neutral, Fairly negative or very negative image? (%)

ST100 Oct./Nov. 2023

3. The future of the European Union

a. The future of the European Union: trend

More than six in ten Europeans are optimistic about the future of the EU (61%, -2 percentage points since spring 2023). This is the lowest level of optimism since summer 2020. More than one third are pessimistic (35%, +1 pp), while 4% say they don't know.

QA12 Would you say that you are very optimistic, fairly optimistic, fairly pessimistic or very pessimistic about the future of the EU?

Optimism about the future of the EU

Standard Eurobarometer 100
Autumn 2023

b. The future of the European Union: national results

In 25 Member States (down from 26 in spring 2023) respondents are optimistic about the future of the EU. Optimism is highest amongst respondents in Ireland (83%), Denmark (81%) and Poland (77%). More than half in Cyprus (51%) and Bulgaria and Czechia (55% each) are also optimistic.

Pessimism prevails only in France (49% 'pessimistic' vs 47% 'optimistic') and Greece (49% vs 48%).

QA12. Would you say that you are very optimistic, fairly optimistic, fairly pessimistic or very pessimistic about the future of the EU? (%)

4. The EU flag: trend and national results

More than eight in ten Europeans think the European flag is a good symbol for Europe (85%, +1 percentage point since Standard Eurobarometer 90 in autumn 2018). Fewer than one in ten (9%, -1 pp) disagree, while 6% say they don't know.

Eight in ten (80%, +5 percentage points since autumn 2018) agree that the European flag stands for something good. Just over one in ten (11%, -3 pp) disagree, while 9% say they don't know.

QC9. This symbol is the European flag. I have a list of statements concerning it I would like to have your opinion on each of these. For each of them, could you please tell me if you tend to agree or tend to disagree? (EU27) (%)

Standard Eurobarometer 100

Autumn 2023

In all EU Member States, important majorities of respondents agree that this flag stands for something good, with the highest proportions in Sweden (92%), Malta and the Netherlands (both 89%), and the lowest in Austria (65%), Estonia (67%) and Czechia (68%).

QC9.2. This symbol is the European flag. I have a list of statements concerning it. I would like to have your opinion on each of these. For each of them, could you please tell me if you tend to agree or tend to disagree? : -This flag stands for something good (%)

II. The main concerns of Europeans

Standard Eurobarometer 100

Autumn 2023

1. Main concerns at European level: trend

Immigration and the war in Ukraine have overtaken rising prices] inflation] cost of living as the most important issues facing the EU at the moment. It is important to note that the war in Ukraine is a new option for this wave of the survey. Its inclusion will have had a considerable impact on the results for this wave and the trends since spring 2023. Therefore, trend changes since spring 2023 should be interpreted with caution.

Almost three in ten think immigration (28%) is one of the two most important issues facing the European Union at the moment. This is an increase of four percentage points since spring 2023, and immigration has risen from third to first place. The war in Ukraine (28%) ranks first jointly with immigration.

The international situation is in third position (24%, -1 pp), while rising prices/ inflation/ cost of living has dropped from first to fourth place (20%, -7 pp). All other issues are mentioned by less than one in five respondents.

Environment and climate change has dropped from fourth to fifth place (16%, -6 pp), and the economic situation has moved from fifth to sixth position (14%, -3 pp).

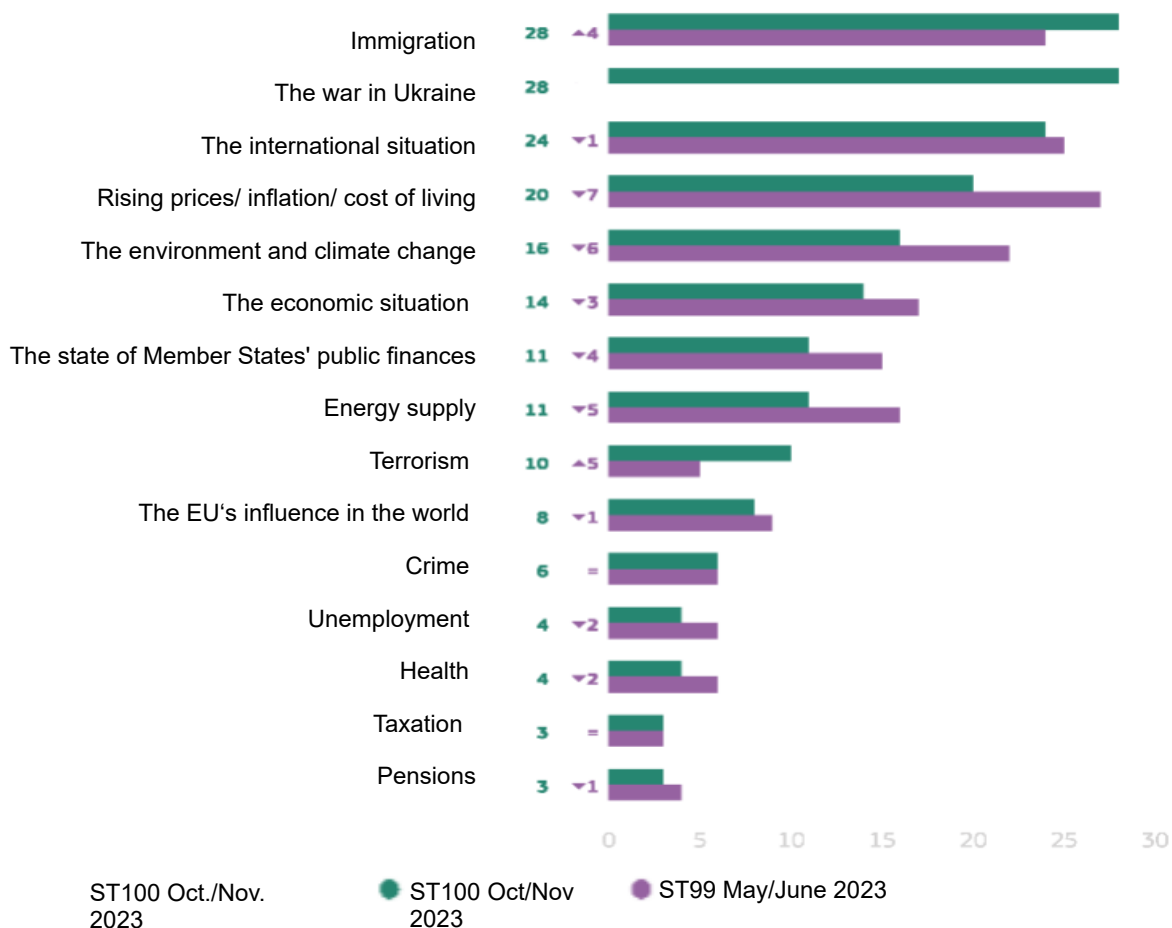

Energy supply has dropped from sixth to seventh position (11%, -5 pp), and it shares seventh place with the state of Member States' public finances (11%, -4 pp, no change in position).

Terrorism has risen from twelfth to ninth position (10%, +5 PD) and is the only other issue mentioned by at least one in ten.

The EU's influence in the world has dropped from eighth to tenth position (8%, -1 pp), while crime has dropped from ninth to eleventh place (6%, no change).

The remaining four issues are mentioned by no more than one in twenty: unemployment (4%, -2 pp), health (4%, -2 pp), taxation (3%, no change) and pensions (3%, -1 pp).

QA5. What do you think are the two most important issues facing the EU at the moment?
(MAX. 2 ANSWERS) (EU27) (%)

Standard Eurobarometer 100

Autumn 2023

2. Main concerns at European level: national results

Two issues rank as the most important facing the EU at the moment: immigration and the war in Ukraine. The war in Ukraine ranks first in 17 countries, while immigration ranks first in seven countries (in Austria both issues share first place with the international situation).

The war in Ukraine ranks in the top three in 26 Member States. It ranks first in 17 countries including Estonia (49%), Lithuania (48%) and Ireland (46%) (sharing first position in Austria with immigration and the international situation). It is in second position in Germany (34%), Bulgaria (29%, shared with immigration) and Italy (22%) and ranks third in six countries including the Netherlands (35%) and Luxembourg and Cyprus (24% each).

Immigration ranks first in seven Member States (up from five in spring 2023 and shared in Austria with the international situation and the war in Ukraine) including Cyprus (46%), the Netherlands (43%) and Germany (43%). It ranks second in eight countries including Czechia and Slovenia (33% each) and Hungary (28%) (shared in Latvia with the international situation and in Bulgaria with the war in Ukraine). It is the third most mentioned issue in seven countries, including Malta (31%), Slovakia (27%) and Ireland (25%).

The international situation ranks first in four countries (down from 11 in spring 2023): Bulgaria (34%), Greece (32%), Austria (25%, shared with immigration and the war in Ukraine) and Italy (24%, shared with rising prices/inflation/cost of living).

The significant reduction of this issue in first place rankings is likely to be attributable to the addition of a separate option for the war in Ukraine in this wave of the survey. It ranks second in eight countries, including Malta (34%), Estonia and Finland (33% each), and ranks third in

eight countries including Denmark (28%), Czechia (25%) and Germany and Sweden (24% each).

Rising prices] inflation] cost of living ranks as the fourth most important issue at the EU level but sits in first place in Luxembourg (31%) and Italy (24%, shared with the international situation). It ranks second in six countries including Ireland and Cyprus (27% each) and Belgium (26%), and places third in six countries including Croatia (26%), Latvia (22%), Austria and Bulgaria (20% each).

Fifth at the EU level, the environment and climate change ranks second in Sweden (40%), in Denmark and the Netherlands (36% each) and Austria (22%). It ranks third in France (20%) and Finland (19%).

The economic situation is in sixth position at the EU level but ranks third in Greece (19%, along with rising prices/ inflation/ cost of living, energy supply and the war in Ukraine) and Italy (19%, along with immigration).

Energy supply is the only other issue that appears in the top three in any country, ranking third in Greece (19%) along with the war in Ukraine, rising prices/ inflation/ cost of living and the economic situation.

Autumn 2023

3. Main concerns at national level: trend

Rising prices/ inflation/ cost of living remains the most important issue at national level at the moment (44%), down one percentage point since spring 2023.

Immigration has risen from fourth to second position (20%, +6 pp), and is the only other issue mentioned by at least one in five.

The economic situation has declined from second to third position (18%, no change) and the environment and climate change has declined from third to fourth position (13%, -3 pp).

Health (12%, -2 pp) has declined from fourth to fifth position, while the international situation has risen from ninth to sixth position (11%, +2 pp). Housing remains in seventh position (10%, no change).

Four issues share eighth position. Crime (9%, +1 pp) has increased from thirteenth position, unemployment (9%, no change) is up from ninth position, government debt (9%, no change) has risen from ninth position, and energy supply (9%, -3 pp) has dropped from sixth position.

The education system (8%, -1 pp) has dropped from ninth to twelfth position, while pensions (7%, -3 pp) have dropped from ninth to thirteenth position.

Taxation (6%, +1 pp) remains in fourteenth position and terrorism (5%, +3 pp) remains in fifteenth position.

QA3. What do you think are the two most important issues facing (OUR COUNTRY) at the moment? (MAX 2 ANSWERS) (EU27) (%)

Standard Eurobarometer 100

Autumn 2023

4. Main concerns at national level: national results

Rising prices/ inflation/ cost of living is ranked in the top three issues in 26 Member States. It is considered the most important issue facing their country by citizens in 20 Member States (down from 22 in spring 2023), including Croatia (68%), Greece (57%) and Estonia (55%). It ranks in second place in Ireland (55%), Luxembourg (48%), Cyprus (46%) and Germany (41%) and in third place in the Netherlands (38%) and Sweden (23%, shared with the education system).

Immigration ranks in first position in two countries (up from no countries in spring 2023): Cyprus (50%) and Germany (44%). It is in second place in Malta (37%), Slovenia (26%), Austria (24%) and Belgium (20%). It sits in third position in France (17%), Italy (17%, shared with unemployment), Slovakia (16%, shared with health) and Hungary (13%, shared with energy supply).

The economic situation ranks second in 11 countries including Greece (33%), Croatia (29%) and Italy (28%) (shared in Lithuania with taxation). It ranks third in Cyprus (33%), Czechia (24%) and Latvia (23%).

The environment and climate change ranks first in Denmark (47%) and second in the Netherlands (39%) and Sweden (30%). It ranks third in five countries: Malta (24%), Austria (20%), Germany and Luxembourg (17% each) and Belgium (16%).

Health ranks in second position in Portugal (44%), Denmark (40%), Latvia (27%) and Hungary (24%). It ranks third in six countries, including Slovenia (25%), Finland (24%) and Ireland (23%).

The international situation ranks second in Finland (25%) and third in Denmark (27%), Bulgaria (18%) and Poland (16%).

Housing ranks in first position in Ireland (56%), Luxembourg (53%) and the Netherlands (45%) and ranks in third position in Portugal (21%).

Sweden (46%) is the only country where crime is the most mentioned issue. Crime ranks second in France (21%) and third in Croatia and Belgium (16% each).

Government debt ranks second in Czechia (26%), while unemployment is the third most mentioned issue in Spain (23%), Greece (20%) and Italy (17% along with immigration).

Energy supply is the third most mentioned in Hungary (shared with immigration), while the education system is the third most mentioned in Sweden (23% along with rising prices/ inflation/ cost of living).

Taxation is the only other issue mentioned in the top three in any country, ranking second in Lithuania (21%, along with the economic situation) and third in Estonia (26%).

 2nd Most Frequently Mentioned Item
 3rd Most Frequently Mentioned Item

Standard Eurobarometer 100
Autumn 2023

III. The economic situation

1. Perception of the European economy

a. Current situation of the economy at a European level: trend and national results

The perception of the situation of the European economy has remained stable since spring 2023, with 45% of respondents rating it as 'good' (no change). Almost as many Europeans think the situation of the European economy is 'bad' (44%, no change).

The percentage of respondents viewing the situation of the European economy as 'good' remains at its highest point since autumn 2019 (EB92), where it stood at 47%.

QA1.3 How would you judge the current situation in each of the following?

The situation of the European economy (% - EU)

Current situation of the European economy

Standard Eurobarometer 100

Autumn 2023

Opinion about the current situation of the European economy varies importantly between countries. A majority of respondents in 17 countries (down from 18 in spring 2023) think the situation is good, with the highest levels seen in Poland (69%), and Denmark and Lithuania (67% each). In contrast, the negative view is dominant in ten countries, including Czechia (61%) and Italy and Germany (52% each).

It is worth noting that one quarter of respondents in Bulgaria say they don't know.

In 13 countries opinion about the situation of the European economy has become more negative since spring 2023, with the largest declines seen in Portugal (43%, -17 percentage points), Latvia (50%, -10 pp) and Estonia (36%, -8 pp). In contrast, the positive view has become more widespread in eight countries including Poland (69%, +10 pp) and Austria (47%, +8 pp). There has been no change in opinion in Finland, Hungary, France, Spain, Greece or Germany.

The positive view is now dominant in Slovakia, but the negative view is now the majority opinion in Estonia and Portugal.

QA1.3. How would you judge the current situation in each of the following? : - The situation of the European economy (%)

Standard Eurobarometer 100
Autumn 2023

b. Expectations for the economy at European level: trend and national results

The majority of citizens think the European economic situation will remain the same in the next 12 months (44%,

QA2.7 What are your expectations for the next twelve months: will the next twelve months be better, worse or the same, when it comes to...?
The economic situation in the EU (% - EU)

+1 pp). This view has been steadily increasing since winter 2022-2023. Almost one in five (19%, -1 pp) think the situation will get better, while 28% (+1 pp) think it will get worse.

As a result of these evolutions the optimism index for the European economic situation has declined by two points to -9, although it is considerably higher than the levels seen in summer 2020, and between summer 2022 and winter 2022-2023.

Standard Eurobarometer 100

Autumn 2023

Expectations for the European economic situation have become more positive since spring 2023. The majority of respondent in 23 EU Member States think the European economic situation will remain the same in the next 12 months (up from nine in spring 2023), and this view is most widespread in Hungary and Lithuania (55% each) as well as in Ireland and Malta (54% each).

In the remaining four countries the majority thinks the situation will get worse: Luxembourg (50%), Cyprus (45%), Czechia (42%) and Estonia (35%).

There are seven countries where respondents are more likely to be optimistic than pessimistic (up from one in spring 2023): Croatia (35% "better" vs 21% "worse"), Romania (31% vs 24%), Italy (30% vs 22%), Poland (27% vs 19%), Bulgaria (26% vs 16%), Latvia (23% vs 16%) and Lithuania (20% vs 16%).

QA27. What are your expectations for the next 12 months: will the next 12 months be better, worse or the same, when it comes to... ? :-The economic situation in the EU (%)

2. Perception of the national economy

a. Current situation of the economy at a national level: trend and national results

The positive perception of the situation of the national economy has declined by five percentage points since spring 2023, with 35% now rating it as 'good'. This reverses all the gains made between winter 2022-2023 and spring 2023.

The majority of Europeans think the situation of their national economy is 'bad', with this view increasing by four percentage points since spring 2023 (52%/0)~

QA1.2 How would you judge the current situation in each of the following?
The situation of the (NATIONALITY) economy (% - EU)

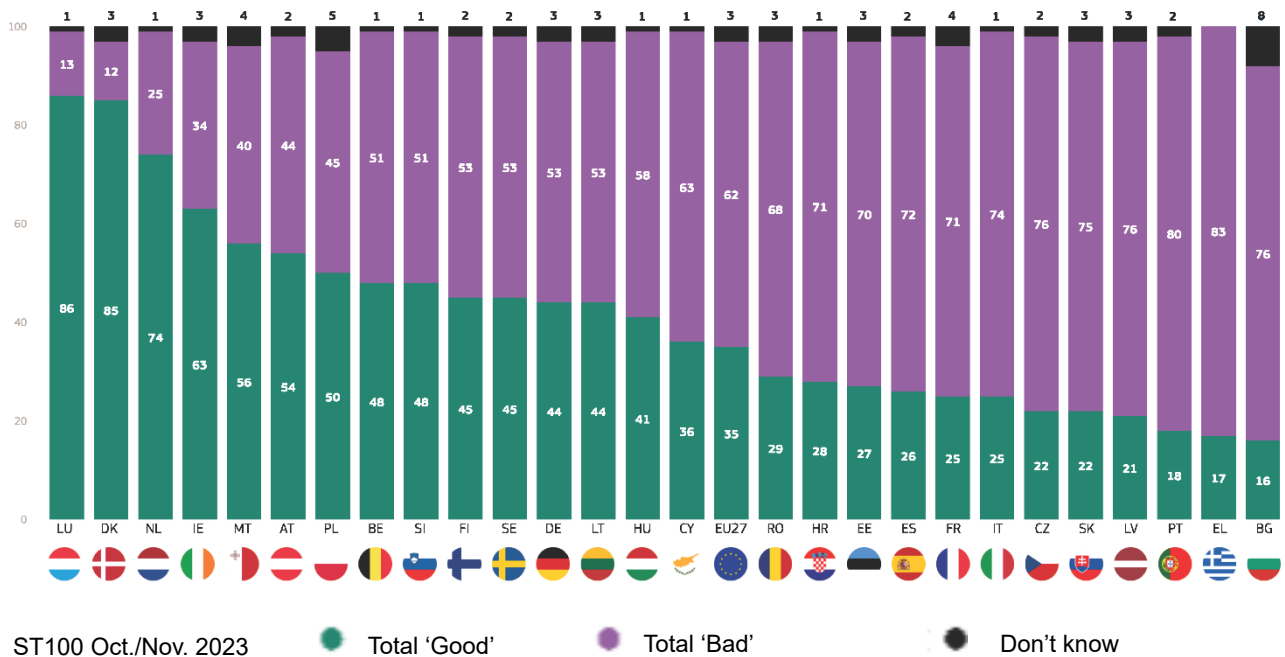

Standard Eurobarometer 100
Autumn 2023

Views on the current situation of the national economy vary dramatically between EU Member States. The majority of respondents in seven Member States (down from ten in spring 2023) have a positive view of their national economy, with the highest levels observed in Luxembourg (86%), Denmark (85%) and the Netherlands (74%). At the other end of the scale 16% of respondents in Bulgaria, 17% in Greece and 18% in Portugal also have a positive view of their national economy.

Compared to the Standard Eurobarometer of spring 2023 (E899), respondents in 17 countries are now less likely to say the situation of their national economy is good, with the most dramatic decline seen in Portugal (18%, -20 percentage points), followed by Sweden (45%, -7 pp), Germany (44%, -7 pp) and Estonia (27%, -7 pp). In contrast, the positive view has increased in eight countries, most notably in Hungary (41%, +5 pp). There has been no change in opinion in Malta or the Netherlands.

The positive view is now the majority opinion in Poland, while the negative view is now the majority opinion in Belgium, Germany, Slovenia, and Sweden.

QA1.2. How would you judge the current situation in each of the following ? - The situation of (NATIONALITY) economy (%)

Standard Eurobarometer 100
Autumn 2023

b. Expectations of the economy at national level: trend and national results

Expectations for the national economic situation have worsened slightly since spring 2023. One in five respondents (-1 percentage point) think their national economic situation will improve in the next 12 months. Almost four in ten (37%, +1 pp) expect the situation to get worse, while four in ten (40%, +1 PP) expect it to remain the same.

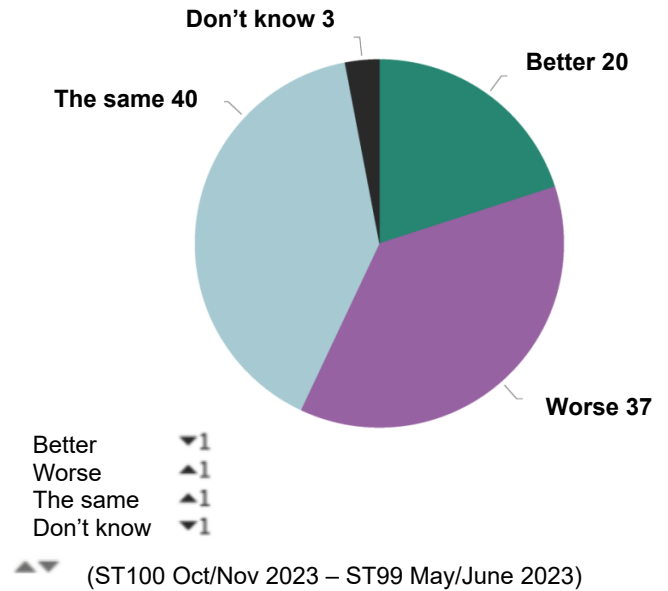

As a result of these changes the optimism index for the national economic situation has declined by two points to -17.

In 16 countries (as in spring 2023) respondents are most likely to think the national economic situation will remain the same in the next 12 months, and more than half in Denmark (63%), Ireland and Hungary (52% each) think this way.

In the remaining 11 countries respondents are most likely to say the national economic situation will get worse, and this view is most widespread in Estonia (57%), Czechia (56%) and Cyprus (54%).

It is worth noting that in all but three countries there are more pessimists than optimists. The exceptions are Denmark, Poland, and Croatia, where there are equal proportions of optimists and pessimists.

QA2.3. What are your expectations for the next 12 months: will the next 12 months be better, worse or the same, when it comes to...? :-The state of (OUR COUNTRY)'s economy (EU27) (%)

QA2.3. What are your expectations for the next 12 months: will the next 12 months be better, worse or the same, when it comes to...? :-The state of (Our COUNTRY)'s economy (%)

3. EU's economic policy

a. Support for the euro: trend and national results

Support for a European economic and monetary union with one single currency, the euro has remained stable for the second consecutive time (71%, no change since winter 2022-2023).

Support is at the second highest level since the euro was introduced. Fewer than a quarter of EU citizens are against the euro (23%, no change).

At 79%, support within the euro area is more widespread and has increased by one percentage point since spring 2023. Opposition has declined by two points since spring 2023 and now sits at 15%.

QB3.1 What is your opinion on each of the following statements? Please tell for each statement, whether you are for it or against it.

A European economic and monetary union with one single currency, the euro (% - EU)

Support for the euro

Standard Eurobarometer 100

Autumn 2023

Support for a European economic and monetary union with one single currency, the euro is the majority position in 22 Member States and in all euro area countries, with the strongest support observed amongst respondents in Slovenia (91%) and Finland and Malta (88% each). More than eight in ten in a further 11 countries are also for the single currency and economic union: Estonia, Luxembourg, and the Netherlands (87% each), Spain and Ireland (86% each), Slovakia (85%), Lithuania (83%), Denmark, Latvia and Portugal (82% each), and Belgium (81%).

Despite not belonging to the euro area, a majority of respondents in Hungary (66%) and Romania (50%) are for a European economic and monetary union with one single currency, the euro.

The five countries where a majority is against the euro are all outside the euro area: Denmark and Czechia (63% each), Poland (56%), Sweden (55%), and Bulgaria (46% vs 39% "for").

Support for the single currency and economic union has declined in 12 countries since spring 2023, with the largest drops seen in Poland (37%, -7 percentage points) and Czechia (27%, -6 pp). Support has increased in 11 countries, including France (77%, +6 pp), Slovenia (91%, +5 pp), and the Netherlands (87%, +5 pp). Support has remained stable in Sweden, Portugal, Luxembourg, and Latvia.

QB3.1. What is your opinion on each of the following statements? Please tell for each statement, whether you are for it or against it. :-A European economic and monetary union with one single currency the euro (%)

Standard Eurobarometer 100

Autumn 2023

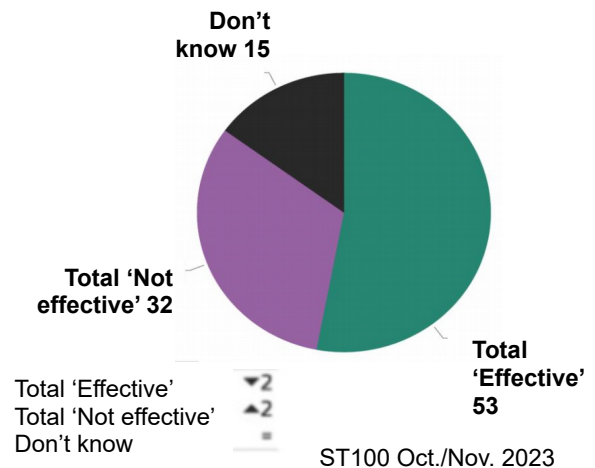

b. The EU recovery plan 'NextGenerationEU': trend and national results

A majority of Europeans think that NextGenerationEU, the EU's recovery plan of more than 800 billion euro, can be effective in responding to current economic challenges (53%, -2 percentage points since spring 2023). More than three in ten do not think it will be effective (32%, +2 pp), while 15% (no change) say that they don't know.

A majority of respondents in 24 Member States (down from 25 in spring 2023) think that NextGenerationEU can be effective in responding to the current economic challenges. This opinion is most widely held amongst respondents in Ireland (78%), Malta (75%) and Croatia (73%). In contrast, only a minority in France (36% vs 38% 'not effective'), Finland (36% vs 40%) and Czechia (38% vs 46%) think this plan can be effective.

More than one third (36%) in Estonia say they don't know.

QB5. The European Union has designed a recovery plan of 800 billion euros, NextGenerationEU, to support the economy through grants and loans. How effective or not do you think that this measure can be to respond to the current economic challenges? (EU27)(%)

QB5. The European Union has designed a recovery plan of 800 billion euros, NextGenerationEU, to support the economy through grants and loans. How effective or not do you think that this measure can be to respond to the current economic challenges? (%)

IV. Russia's invasion of Ukraine

1. Satisfaction with the response to Russia's invasion of Ukraine

a. Satisfaction with the response to Russia's invasion of Ukraine: trend

The majority of EU citizens are satisfied with the response of the EU and national governments to the Russian invasion of Ukraine.

Almost six in ten are satisfied with the EU's response to the Russian invasion of Ukraine (57%, +1 percentage points since spring 2023), with 11% saying they are "very satisfied". Almost four in ten (37%, -1 DP) are dissatisfied, while 6% say they don't know.

Satisfaction with the response of the national government is slightly lower, with 54% (no change) saying they are satisfied, including 11% who say they are "very satisfied". Just over four in ten are dissatisfied (41%, no change), while 5% say they don't know.

QD1. In general, how satisfied are you with the response to the Russia's invasion of Ukraine by ...? (EU27) (%)

The European Union

The (NATIONALITY) Government

● Very satisfied ● Fairly satisfied ● Not very satisfied ● Not at all satisfied ● Don't know

Standard Eurobarometer 100

Autumn 2023

b. Approval of actions taken to respond to Russia's invasion of Ukraine: trend and national results

Support for a range of actions taken in response to Russia's invasion of Ukraine remains very high, although approval for financial support and the financing and supply of military equipment has declined since spring 2023.

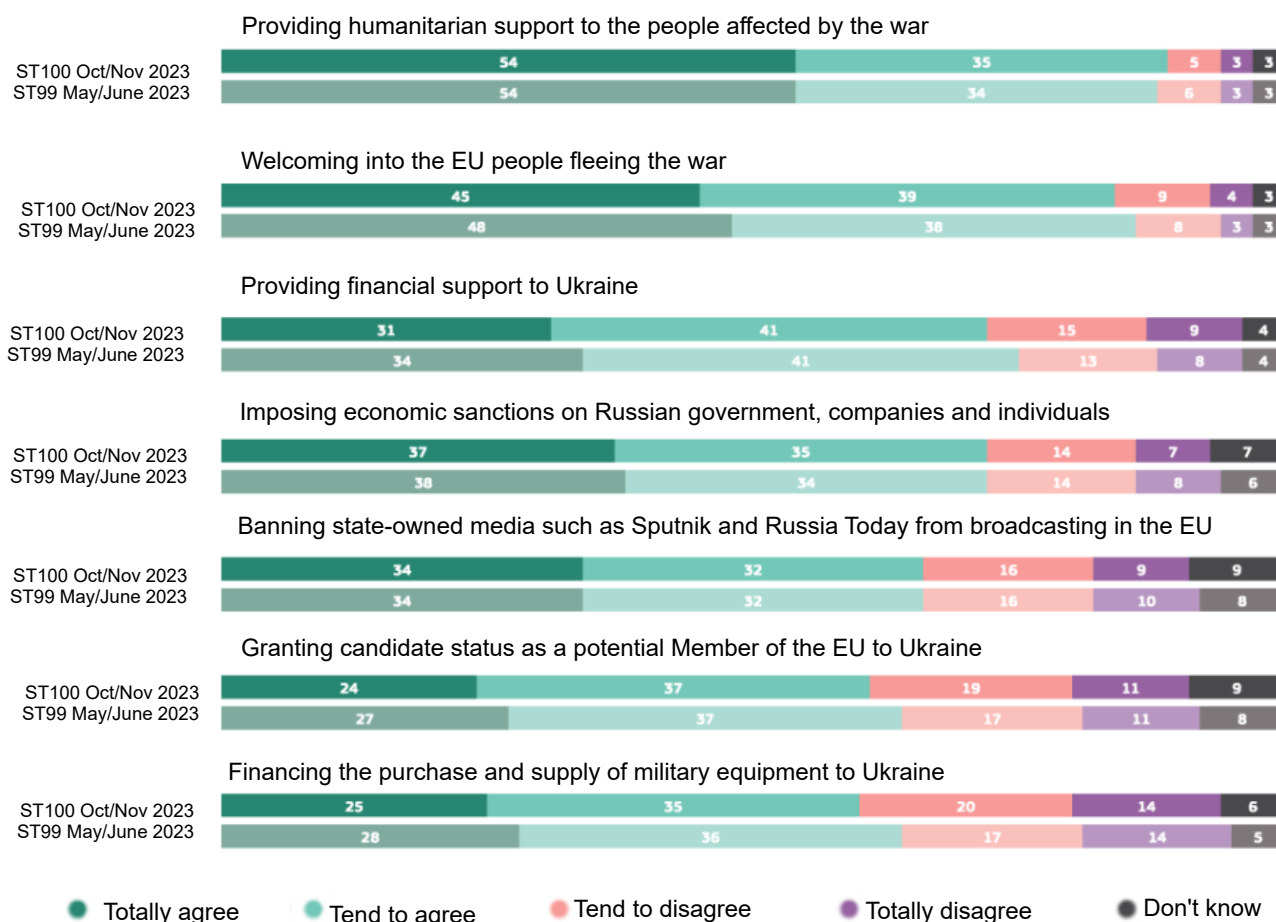

Almost nine in ten (89%, +1 percentage point since spring 2023) agree with providing humanitarian support to the people affected by the war, and the majority (54%) "totally agree" with this action. Also, more than eight in ten (84%, -2 pp) agree with welcoming into the EU people fleeing the war, with 45% saying they "totally agree".

More than seven in ten respondents agree with providing financial support to Ukraine (72%, -3 pp), with 31% totally agreeing. The same proportion (72%, no change) agree with imposing economic sanctions on Russian government, companies and individuals, with 37% totally agreeing.

Two thirds (66%, no change) agree with banning state-owned media such as Sputnik and Russia Today from broadcasting in the EU, with 34% in total agreement.

Just over six in ten (61%, -3 pp) agree with granting candidate status as a potential Member of the EU to Ukraine including 24% who "totally agree", while six in ten (60%, -4 pp) agree with financing the purchase and supply of military equipment to Ukraine, including 25% who "totally agree".

QD2. The EU has taken a series of actions as a response to Russia's invasion of Ukraine. To what extent you agree or disagree with each of these actions taken. (EU27) (%)

Standard Eurobarometer 100

Autumn 2023

In 26 EU Member States (up from 25 in spring 2023) providing humanitarian support to the people affected by the war is the action most widely agreed upon (in equal first place in Denmark, Portugal, and Sweden with welcoming into the EU people fleeing the war). At least seven in ten respondents in each country agree with this statement. Agreement is almost universal in the Netherlands and Finland (98% each) and in Sweden (97%), but less widespread in Romania (70%), and Bulgaria (76%). It is the second most agreed upon action in Romania (70%).

In Sweden financing the purchase and supply of military equipment to Ukraine is the third most agreed upon action (91%).

In Sweden (97%), Portugal (96%) and Denmark (93%) welcoming into the EU people fleeing the war is the joint most agreed upon action, and this action is also the most mentioned in Romania (71%). It is the second most agreed upon action in 21 countries including the Netherlands (97%), Finland (96%), and Luxembourg and Spain (94% each). It is the third most agreed upon action in Poland (86%) and Czechia (63%).

Imposing economic sanctions on Russian government, companies and individuals is the second most agreed upon action in Sweden (96%, along with providing financial support), Portugal (93%), Poland (89%) and Czechia (67%), and the third most agreed upon in seven countries including Denmark and the Netherlands (88% each) and Belgium (77%).

Providing financial support to Ukraine is the second most agreed upon action in Sweden (96%, along with imposing economic sanctions) and Denmark (91%). It is the third most agreed upon action in 17 countries, and particularly in Finland (93%), Portugal (89%), and the Netherlands (88%, along with imposing sanctions).

In Poland (89%) banning state-owned media such as Sputnik and Russia Today from broadcasting in the EU is the second most agreed upon action, and this is the third most agreed upon action in Estonia (68%) and Austria (66%).

c. Defence and security of the EU in the context of Russia's invasion of Ukraine: trend and national results

Almost eight in ten Europeans (79%, -1 percentage point since spring 2023) agree that co-operation in defence matters at EU level should be increased, and almost as many (77%, no change) agree that Member states' purchase of military equipment should be better coordinated.

Almost seven in ten (69%, no change) agree that the EU needs to reinforce its capacity to produce military equipment, and almost two thirds agree that more money should be spent on defence in the EU (65%, -1 pp)-

QD3. Please tell to what extent you agree or disagree with each of the following statements. (EU27) (%)

Standard Eurobarometer 100

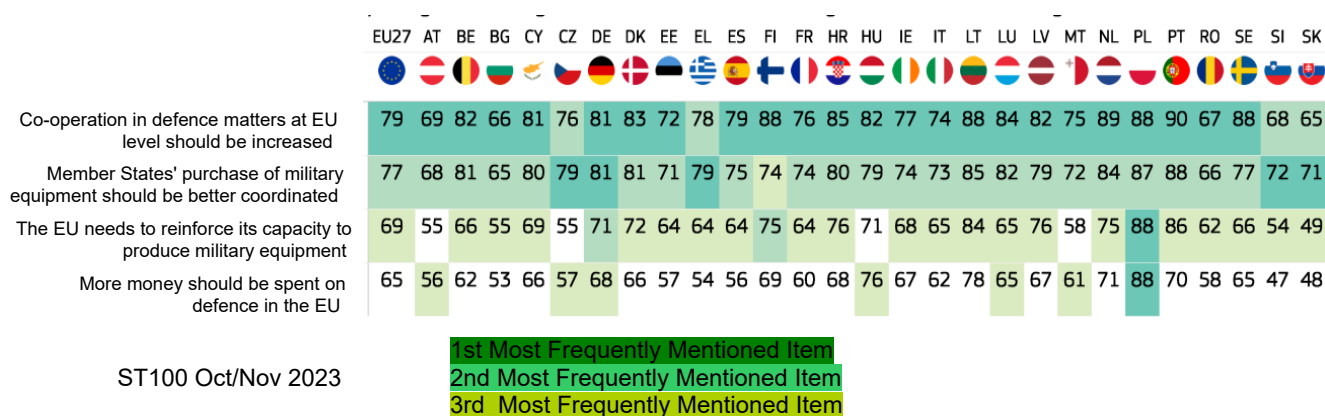

Autumn 2023

Co-operation in defence matters at EU level should be increased appears in the top two rankings in all 27 Member States. In 23 countries (up from 22 in spring 2023) respondents are most likely to agree that co-operation in defence matters at EU level should be increased, with agreement most widespread in Portugal (90%), the Netherlands (89%) and Lithuania, Poland, Finland, and Sweden (88% each).

Member States' purchase of military equipment should be better coordinated ranks in the top three in all 27 Member States. It ranks first in five countries: Germany (81%), shared with co-operation in defence matters), Czechia and Greece (79% each), Slovenia (72%) and Slovakia (71%). It ranks second in 21 countries including Portugal (88%), Poland (87%), and Lithuania (85%). It is in third position in Finland (74%).

In Poland, first place is shared by "the EU needs to reinforce its capacity to produce military equipment", "more money should be spent on defence in the EU", and "co-operation in defence matters at EU level should be increased" (88% each). The EU needs to reinforce its capacity to produce military equipment is the second most agreed upon statement in Finland (75%) and Germany (71%), and the third most agreed upon statement in 20 Member States including Portugal (86%) and Lithuania (84%).

QD3. Please tell to what extent you agree or disagree with each of the following statements. - Total 'Agree' (%)

More money should be spent on defence in the EU shares first place in Poland with "the EU needs to reinforce its capacity to produce military equipment" and "co-operation in defence matters at EU level should be increased". It is the third most agreed upon statement in six countries including Hungary (76%), Germany (68%), and Luxembourg (65%).

V. The EU in the world

Standard Eurobarometer 100

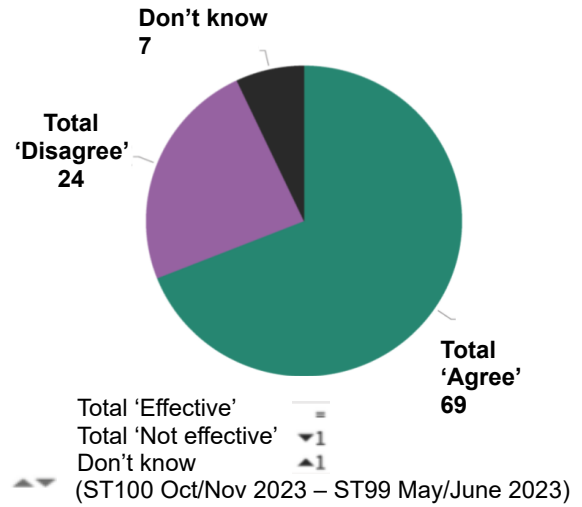

Autumn 2023

1. EU in the global economy: trend and national results

Almost seven in ten respondents (69%, no change since spring 2023) agree the EU has sufficient power and tools to defend the economic interests of Europe in the global economy, with 22% (no change) saying they “totally agree”.

The majority of citizens in every EU Member State agree that the EU has sufficient power and tools to defend the economic interests of Europe in the global economy, although levels vary importantly between countries: they range from 88% in Portugal, 86% in Poland and 82% in Greece, to 52% in France, 58% in Estonia and 61% in Czechia.

4. Values

a. Personal values

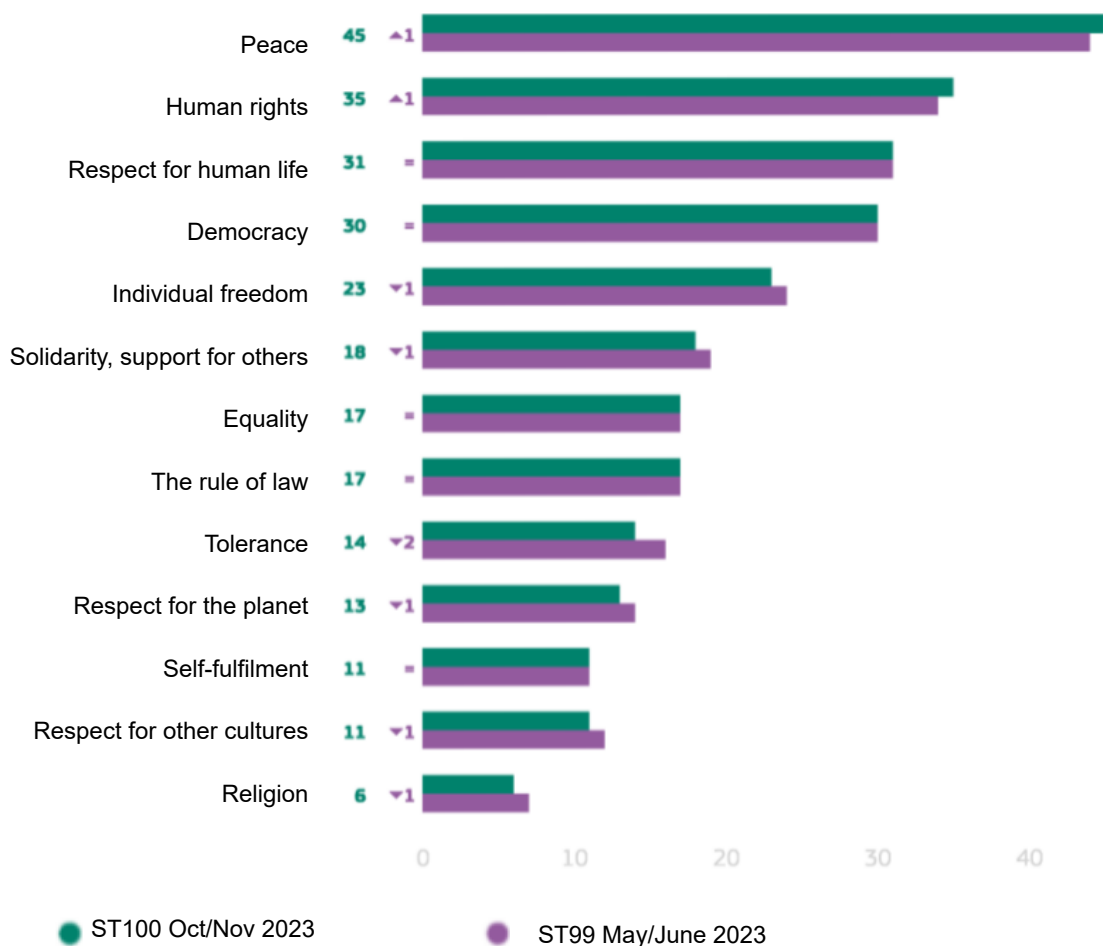

Respondents were asked which values are the most important for them personally. Dominated by peace, these results remain quite stable since spring 2023.

Peace (45%, +1 percentage point since spring 2023) is the most important value for EU citizens personally. At least three in ten mention human rights (35%, +1 pp), respect for human life (31%, no change) and democracy (30%, no change).

Almost one quarter say individual freedom is one of the most important values for them personally (23%, -1 pp), while 18% (-1 pp) mention solidarity and support for others, and 17% say this about the rule of law, and equality (no change for either since spring 2023).

Tolerance is mentioned by 14% (-2 pp), while 13% (-1 pp) mention respect for the planet 11% (-1 pp) mention

QC6. In the following list, which are the most important values for you personally?
(MAX. 3 ANSWERS) (EU27) (%)

respect for other cultures, 11% (no change) mention self-fulfilment and 6% (-1 pp) mention religion.

Standard Eurobarometer 100

Autumn 2023

Peace is one of the three most important personal values to citizens in all 27 EU Member States. It ranks first in 22 countries, including Latvia and Germany (62% each) and Lithuania (60%). Peace is joint first in Italy with respect for human life and in Austria with individual freedom. It is in second position in Cyprus (41%), Malta (38%) and Portugal (37%) and in third place in Sweden (40%) and Spain (31%).

In Sweden (55%), Cyprus (47%) and Portugal (41%) human rights is the most important personal value. This value ranks in the top three in 25 EU Member States. It is in second position in 12 countries, including Denmark, Spain, and Slovenia (43% each) and Latvia (42%). It ranks third in ten countries including Germany (37%), Ireland (35%) as well as Bulgaria and Luxembourg (33% each).

Respect for human life is the most mentioned personal value in Spain (45%), Malta (40%) and Italy (34%, shared with peace). It ranks second in five countries, including Greece and Ireland (39% each) and Luxembourg (35%). It is in third position in six countries, including Cyprus (40%), Portugal (35%) as well as Latvia and Slovenia (33% each).

Democracy is the second most mentioned value in Sweden (47%), Germany (46%) and Italy (32%), and the third most mentioned in six countries including Denmark (37%), Greece (35%) and the Netherlands (32%).

In Austria individual freedom ranks as the most important value (45%, shared with peace). It holds second position in Bulgaria (39%), Czechia (36%), Hungary (32%) and Romania (29%) and third place in Lithuania (33%), Slovakia (31%) and Estonia (20%).

There are three other values that rank in the top three in several Member States. Solidarity and support for others ranks second in Croatia (35%), the rule of law ranks third in Finland (35%) and self-fulfilment ranks third in Estonia (along with individual freedom).

QC6. In the following list, which are the most important values for you personally? (MAX. 3 ANSWERS)

b. EU values

Asking then which values best represent the EU, citizens also most often say peace (37%, no change), with democracy (34%, +1 percentage point) the next most mentioned value. At least one in five say human rights (29%, no change), solidarity and support for others (24%, no change) or the rule of law (23%, +2 pp) best represents the EU.

Respect for other cultures is seen as the value best representing the EU by 16% (-1 pp), as is individual freedom (16%, no change). At least one in ten think respect for human life (14%, +1 pp), tolerance (11%, -2 pp), equality (11%, no change) and respect for the planet (10%, +1 pp) best represent the EU.

Fewer than one in ten mention self-fulfilment (6%, no change), or religion (4%, no change).

QC7. In the following list, which values best represent the EU? (MAX. 3 ANSWERS)
(EU27) (%)

Standard Eurobarometer 100

Autumn 2023

In 24 EU Member States peace ranks in the top three values that best represent the EU. It sits in first position in 13 countries with the highest levels in Luxembourg (49%), Germany (47%) and Slovenia (46%). In Cyprus, first place is shared with human rights. It ranks second in eight countries including the Netherlands (46%), Sweden (45%) as well as Denmark and Finland (44% each) and third in Belgium (35%), Austria (29%) and Hungary (24%).

Democracy is in the top three values in 24 EU Member States. It ranks first in seven countries, with the highest levels in Sweden (55%), Denmark (49%) and the Netherlands (48%). It ranks second in ten countries including Germany (38%), Malta and Belgium (36% each) and Bulgaria and Greece (32% each). It sits in third position in seven countries including Luxembourg (32%), France and Lithuania (28% each).

In 22 Member States human rights is considered among the three values that best represents the EU and it ranks first in Malta and Belgium (40% each), Ireland and Cyprus (32% each, shared in Cyprus with peace) and Austria (31%, shared with solidarity and support for others). Human rights sits in second position in eight countries including France (36%), Latvia (35%) and Luxembourg (34%), and in third place in nine countries, including Sweden (41%), the Netherlands (40%) and Denmark (38%).

Solidarity and support for others is the most mentioned value in Portugal (42%), Croatia (37%), Austria (31%, shared with human rights) and Hungary (29%). It ranks second in Romania (28%) and third in seven countries including Malta (34%), Czechia (30%) and Germany (28%).

Only two other values are mentioned in the top three in any Member State. The rule of law ranks second in Spain

(33%) and third in Finland (43%), Slovenia (27%), Bulgaria (25%) and Cyprus (23%). In Italy (24%) respect for other cultures ranks third among the values that best represent the EU.

QC7. In the following list, which values best represent the EU? (MAX 3 ANSWERS) (%)

Standard Eurobarometer 100
Autumn 2023

Conclusion

Standard Eurobarometer 100

Autumn 2023

The autumn 2023 edition of the Standard Eurobarometer (EB100) shows a relatively stable perception of the EU and its policies.

Trust in the EU has remained stable since spring 2023 and is the view of the majority of citizens both at the EU27 level, and in 20 Member States. However, trust in the EU has declined in 15 countries since spring 2023. Trust in both national governments and national parliaments has increased since spring 2023, although the EU remains more trusted than either of these institutions.

The positive image of the EU remains the majority view of EU citizens, despite a slight decline since spring 2023. It has also declined in 18 Member States. Positive image of the EU is the majority opinion in 19 Member States. Despite a slight decline since spring 2023, optimism for the future of the EU is shared by more than six in ten respondents and remains the majority opinion in 25 Member States.

At least eight in ten citizens think the European flag is a good symbol for Europe, and that the flag stands for something good, an increased proportion compared with the last time the question was asked, in 2018.

In autumn 2023 the main concerns of Europeans at EU level are focussed on wider European and international issues. Immigration and the war in Ukraine (introduced for the first time in this survey) rank in joint first position, with the international situation dropping to third position. Rising prices/ inflation/ cost of living, which ranked first in spring 2023 has dropped to fourth position as the most important issues facing the EU at the moment. The addition of the war in Ukraine as a response option in this survey has undoubtedly impacted on these rankings. Immigration, the war in Ukraine and the international situation rank in the top three in a majority of Member States.

The main concerns of Europeans at the national level reflect both economic concerns and international issues. Rising prices/ inflation/ cost of living remains the most important national issue by a considerable margin. However, immigration has increased six percentage points since spring 2023 to occupy second position, moving the economic situation down to third place and the environment and climate change from third to fourth position. Rising prices/ inflation/ cost of living is one of the three most mentioned issues in 26 EU Member States.

Views on the European economic situation have remained stable since spring 2023, with more than four in ten continuing to rate the current economic situation to be "good" and the positive view continuing to slightly outweigh the pessimistic view. The majority of citizens think the European economic situation will remain the same in the next 12 months. Although in almost all Member States a majority also think the European economic situation will stay the same in the next 12 months, the number of countries where optimism outweighs pessimism has increased (from one country in spring 2023, up to seven countries in autumn 2023).

Opinion about the current national economic situation has become less positive, with the proportion rating it as "good" declining by five percentage points since spring

2023. Optimism about the national economic situation in the next 12 months has also declined slightly, with almost as many now expecting the situation to get worse as to stay the same.

The current survey shows stability at a very high level in support for a European economic and monetary union with one single currency, with over seven in ten in the EU as a whole in favour. Support in the euro area is even higher, at almost eight in ten.

More than half of all respondents think NextGenerationEU, the EU's recovery plan of more than 800 billion euro, can be effective in responding to current economic challenges, and a majority in 24 Member States agrees.

In the context of Russia's invasion of Ukraine, support for a common defence and security policy among EU Member States has remained stable at a high level: Over three quarters of EU citizens, and more than six in ten in each Member State are in favour. More than three quarters of Europeans agree that co-operation in defence matters at EU level should be increased and that Member States' purchase of military equipment should be better coordinated. Almost seven in ten agree that the EU needs to reinforce its capacity to produce military equipment, while almost two thirds agree that more money should be spent on defence in the EU.

Turning to citizens' views on the war in Ukraine, almost six in ten are satisfied with the EU's response to the Russian invasion, a slight increase since spring 2023. A smaller majority are satisfied with the response of the national government.

Support for a range of actions taken in response to Russia's invasion of Ukraine remains high, although approval for financial support and the financing and supply of military equipment has declined since spring 2023. Almost nine in ten agree with providing humanitarian support to the people affected by the war and more than eight in ten agree with welcoming into the EU people fleeing the war. Agreement with providing financial support to Ukraine has declined three points to just over seven in ten, and the same proportion agrees with imposing economic sanctions on the Russian government, companies, and individuals. Two thirds agree with banning state-owned media such as Sputnik and Russia Today from broadcasting in the EU. Around six in ten approve of the EU granting candidate status as a potential member of the EU to Ukraine or with financing the purchase and supply of military equipment to Ukraine but support for both of these measures has declined since spring 2023.

When it comes to energy independence, more than eight in ten citizens agree that the EU should invest massively in renewable energies, such as wind and solar power and that the EU should reduce its dependency on Russian sources of energy as soon as possible. A majority in each Member State agree with each of these statements.

In a troubled international context, citizens are positive about the EU's place in the world. Seven in ten agree the European Union is a place of stability in a troubled world, and almost as many that the EU has sufficient power and tools to defend the economic interests of Europe in the

Standard Eurobarometer 100

Autumn 2023

global economy. Almost seven in ten are for a common foreign policy of the Member States of the EU.

When asked about the values that best represent the EU, Europeans are most likely to mention peace, democracy and human rights. Peace is also in first place for values that are the most important for them personally, with human rights in second place, above respect for human life.

Technical Specifications

Between 23¹⁹ October 2023 and 17 November 2023, Verian on behalf of Kantar Belgium carried out the wave 100.2 of the Eurobarometer survey, on request of the European Commission, Directorate-General for Communication, "Media monitoring and Eurobarometer" Unit.

The wave 100.2 includes the Standard Eurobarometer 100 survey and covers the population of the nationalities of the European Union Member States, resident in each of the 27 Member States and aged 15 years and over.

The Standard Eurobarometer 100 survey has also been conducted in 10 other countries or territories: seven candidate countries (Albania, Bosnia and Herzegovina, Moldova, Montenegro, North Macedonia, Serbia, Türkiye), the Turkish Cypriot Community in the part of the country that is not controlled by the government of the Republic of Cyprus, as well as in Kosovo²⁰ and in the United Kingdom.

In these countries and territories, the survey covers the national population of citizens and the population of citizens of all the European Union Member States that are residents in these countries and territories and have a sufficient command of the national languages to answer the questionnaire.

The basic sample design applied in all countries and territories is a stratified multi-stage, random (probability) one. In each country, the sample frame is first stratified by NUTS regions and within each region by a measure of urbanity (DEGURBA). The number of sample points selected in each strata reflects the stratum population 15+. At the second stage sampling points were drawn with probability proportional to their 0+ population size from within each stratum.

The samples thus represent the whole territory of the countries surveyed according to the EUROSTAT NUTS II (or equivalent) and according to the distribution of the resident population of the respective nationalities in terms of metropolitan, urban and rural areas²¹.

In each of the selected sampling points, a starting coordinate was drawn at random and a reverse geocoding tool used to identify the closest address to the coordinate.

This address was the starting address for the random walk. Further addresses (every Nth address) were selected by standard 'random route' procedures, from the initial address. In each household, the respondent was drawn, at random. The approach to the random selection was conditional on the household size. By way of example

for households with two 15+ members the script was used to select either the informant (person responding to the screener questionnaire) or the other eligible member in the household. For households with three 15+ members the script was used to select either the informant (1/3 of the time) or the two other eligible members in the household (2/3 of the time). Where the two other members were selected, the interviewer was then told to either ask for the youngest or oldest. The script would randomly assign the selection to youngest or oldest with equal probability. This process continues for four 15+ household members — randomly asking for the youngest, 2nd youngest and oldest. For households with five 15+ members we revert to the last birthday rule.

If no contact was made with anyone in the household, or if the respondent selected was not available (busy), the interviewer revisited the same household up to three additional times (four contact attempts in total). Interviewers never indicate that the survey is conducted on behalf of the European Commission beforehand; they may give this information once the survey is completed, upon request.

The recruitment phase was slightly different in the Netherlands, Finland, and Sweden. In these two latter countries, a sample of addresses within each sampling point were selected from the address or population register (in Finland, selection is not done in all sample points, but in some where response rates are expected to improve). The selection of addresses was done in a random manner. Households were then contacted by telephone and recruited to take part in the survey. In the Netherlands, a dual frame RDD sample (mobile and landline numbers) are used as there is no comprehensive population register with telephone numbers available. The selection of numbers on both frames is done in a random manner with each number getting an equal probability of selection. Unlike Sweden and Finland, the sample is unclustered.

19 Exceptionally, Montenegro started fieldwork on 18 October 2023.

20 This designation is without prejudice to positions on status and is in line with UNSCR 1244/99 and the ICJ Opinion on the Kosovo declaration of independence.

Interviewing mode per country

Interviews were conducted through face-to-face interviews, either physically in people's homes or through remote video interaction in the appropriate national language. Interviews with remote video interaction ("online face-to-face") or CAVI (Computer Assisted Video

Interviewing), were conducted in Czechia, Denmark, Malta and Finland.

Autumn 2023

Response rates

For each country a comparison between the responding sample and the universe (i.e. the overall population in the country) is carried out. Weights are used to match the responding sample to the universe on gender by age, region and degree of urbanisation. For European estimates (i.e. EU average), an adjustment is made to the individual country weights, weighting them up or down to reflect their 15+ population as a proportion of the EU 15+ population.

The response rates are calculated by dividing the total number of complete interviews with the number of all the addresses visited, apart from ones that are not eligible but including those where eligibility is unknown. For wave 100.2 of the EUROBAROMETER survey, the response rates for the EU27 countries, calculated by Verian, are:

	COUNTRIES	CAPI RESPONSE RATE
BE	Belgium	47.0%
BG	Bulgaria	48.1%
CZ	Czechia	53.5%
DK	Denmark	36.0%
DE	Germany	26.5%

Standard Eurobarometer 100
Autumn 2023

Comments

(Pierre Dieumegard)

- Graphs with a timeline are difficult to understand. Until 2019, there were two surveys a year, in spring and autumn, and the year number was indicated. From 2020 to 2022, some surveys were carried out in winter, at the end of one year or the beginning of the next, which explains the notation 20/21, 21/22 and 22/23. In 2023, in addition to EBStandard98 (January-February), there were EBStandard99 (spring) and EBStandard100 (autumn).

- Some tables are in "text" mode, making them easy to copy/paste and process by spreadsheet and statistical software, while others are in "image" mode, making them impossible to use. For example (February 20, 2024), [the "data annex" file in English](#) has table QA6.2 in "image" mode, while [the corresponding file in French](#) has table QA6.2 in "text" mode. The English file is heavier than the French and German files, because it contains more images and less text. For easy use of the data, don't limit yourself to the English report.

Autumn 2023

QA6 How much trust do you have in certain institutions? For each of the following institutions, do you tend to trust it or tend not to trust it? (% - EU - TEND TO TRUST)

Trust in national governments, national parliaments, and the European Union

- Confidence in the European Union remains stable at 47%, but confidence in national governments and parliaments has risen sharply (+4 and +6 percentage points).

QB2.2 What is your opinion on each of the following statements? Please tell for each statement, whether you are for it or against it.

A common defence and security policy among EU Member States (% - EU)

- The war in Ukraine has not changed Europeans' minds about the need to coordinate defense policies (question QB2.2).
